

FEDERAL SOLUTIONS: ANIXTER GERMANY

How We Help U.S. Federal Constituents: Government and Military

With years of experience working with federal government entities at home and abroad, we understand your needs, processes and language. Our flexible and dedicated sales specialists can quote complete and complex bills of materials to meet your diverse needs. Anixter Germany can accept a PO directly (through open market), the RFP/bid process, P-Cards, or through our cooperative contracts or federal contract vehicles.

Through our superior product offerings, unmatched global distribution network, expert supply chain management and technical know-how, we drive efficiency and effectiveness to benefit your bottom line and accomplish the mission at hand.

As a strategic hub for U.S. forces worldwide, we recognise the importance of fast and efficient support in Germany and throughout Europe.

We offer:

- Local warehouses with a dedicated and diverse inventory for federal customers
- Time- and cost-saving Supply Chain Solutions
- Military engineering and installation experience
- A dedicated federal inside sales team, logistics team and in-country account manager
- A Common Access Card (CAC) holder
- Supplier and technical training
- Dedicated local inventory for federal customers
- OEM engineering support
- Product testing and evaluation

Anixter's Federal Procurement Vehicles

We take pride in serving our government customers. We hold a large number of contracts with all levels of the United States government across the globe – from Germany to the Middle East – to assist you with procuring data, communications, power, lighting and security products. Most U.S. federal entities have contracts that Anixter can successfully work within.

Technology Support Services

By acting as a single source for your multimanufacturer environment, Anixter's engineers can help you implement new applications or optimise your existing infrastructure with a suite of customisable support offerings.

- Solution and application engineering
- Bill of material generation
- Conceptual drawings
- Codes and standards interpretation
- Installation recommendations and best practices
- Education via Anixter University

Time- and Cost-Saving Supply Chain Solutions

Anixter's customisable Supply Chain Solutions can simplify your material management and improve installation efficiency at your job site, so you can meet your project objectives on time and within budget. By applying supply chain best practices to the technology deployment challenges you face every day, we help you reduce costs, save time, improve productivity and mitigate risk.
