Comprehensive Federal Solutions

We build, connect, power and
protect the world.

Ingenuity delivered.

Insights, Guidance and Solutions to Best Serve Your Needs

Construction Material Management Expertise

- New construction
- IDIQ contract support
- Base operational support (BOS)

Diverse Agency Portfolio (sample organizations)

- Architect of the Capitol
- US Army Corps of Engineers
- Naval Facilities Engineering Command
- Department of State Overseas Building Office
- General Services Administration (GSA)

Value-Added Services

Capable of leveraging and negotiating blanket purchase agreements (BPAs) to bolster cost savings

- CONUS sourcing mechanisms to drive down delivery cost and time
- OCONUS delivery when necessary
- Staged inventory offering to accommodate projects with restricted-space jobsites
- Technology & Support Services (TSS) provide technical insight and expert advice to define innovative solutions and service
- Kitting: pre-package multiple components into one kit to reduce errors, improve material handling and reduce labor cost.

Small Business Partnerships

Wesco Anixter continuously strives to foster relationships with small businesses to support the subcontracting initiative which focuses on increasing opportunities for disadvantaged, HUBZone-certified, veteran-owned, service-disabled-veteran-owned and woman-owned small businesses to receive maximum practical opportunities in federal government subcontract awards.

Custom Assembly

Design, build, test and package deployable telecommunications and Pro A/V solutions for military, ITAR and ISO 9001.

Professional A/V Solutions for a Control Room

Expertise To Support Your Control Room Needs

Control rooms in both public and private organizations act as operational nerve centers, designed to monitor, control and document information, and protect against network or security threats, 24/7. They provide real-time, actionable intelligence to enable data-driven decision-making via a wide range of operational technologies, including physical security and audio-visual solutions. In this demanding environment, operators can face challenges handling vast amounts of data, monitoring a multitude of screens and using systems that become quickly outdated.

That is why it's important to continually assess digital signage, video walls, desktop monitors, signal management and control consoles to allow for maximum employee productivity and uninterrupted access to the data being monitored. Wesco Anixter's professional A/V experts can provide comprehensive solutions and capabilities to help design your optimal control room and keep it running smoothly.

Comprehensive Solutions

- Access control
- Audio visual
- Cabling
- Furniture (control room consoles)
- Lighting
- Locking solutions
- Networking
- Power and thermal management
- Racks, cabinets and enclosures
- Servers and storage
- Video surveillance
- Wireless

Services

- Advisory services
- Installation enhancement
- Project deployment
- Supply chain services

Your Partner in Professional A/V

As the pace of change within control rooms continues to increase, Wesco Anixter provides solutions and expertise to help you to meet and exceed customer demands. Whether local, national or global, our collaborative approach is designed to achieve your goals.
