

CommScope, Wesco and you

Better networks for a better world

COMMScope®

wesco | anixter

The network is undergoing unprecedented transformation in terms of scope and complexity, and you are challenged—as never before—to maximize the network’s operational capabilities while meeting your organization’s aggressive sustainability and governance objectives. You’re not alone.

For more than 40 years, CommScope and Wesco have worked together to help our customers overcome their most difficult network challenges. As recognized leaders in the network infrastructure sector, CommScope and Wesco not only excel at delivering the innovative solutions and strategies that fuel your network’s success, we also champion the fight for a more sustainable, equitable world.

Wesco

Wesco is a leading provider of network distribution and logistics services and a key partner for customers looking to increase market share and profitability while strengthening sustainability and equity outcomes. After more than a century, our focus has not wavered.

Wesco 2022 sustainability highlights

Environmental	Social	Governance
<ul style="list-style-type: none"> • Reduced greenhouse gas emissions by 4% • Reduced landfill waste intensity by 11% • Saved customers a potential 133 Million kWh • Total project potential avoided CO₂ Emissions were over 94 Million kg 	<ul style="list-style-type: none"> • Launched Ignite Change leadership program • Completed 181,000 hours of health and safety training • Delivered 2,709 hours of diversity and inclusion training • 5 Business Resource Groups engage over 2,200 employees across 40 countries 	<ul style="list-style-type: none"> • Refreshed Code of Business Conduct • Enhanced Business Conduct and Duty to Report Policy • New Antiretaliation Policy • Updated Global Anti-Bribery and Corruption Policy

CommScope

CommScope pushes the boundaries of technology to create the world’s most advanced networks. Our commitment to sustainability and innovation drives us to solve our customers’ toughest challenges and connect the world to a brighter future. It’s a commitment that begins at home with our own people and products.

CommScope 2022 sustainability highlights

Environmental	Social	Governance
<ul style="list-style-type: none"> • Cut market-based Scope 1+2 GHG emissions by 22.2% (vs 2019) • Lowered 1+2 GHG emissions intensity by 29.7% (vs 2019) • Kept 82.8% of nonhazardous waste/e-waste from landfills • Completed sustainability assessments and audits of 270 suppliers 	<ul style="list-style-type: none"> • Internal Diversity & Inclusion Business Network includes 1,800 members • Increased U.S.-based ethnic diversity by 21% • Hired 17% more female interns • Expanded Flex@Work program to employees in 45 countries 	<ul style="list-style-type: none"> • Named among America’s Most Responsible Companies by <i>Newsweek</i> • Tied ESG goals to CEO/Section 16 Officers’ short-term incentives • Aligned Supplier Code of Conduct with accepted international standards • Helped 73% of suppliers boost quality audit scores via training and corrective actions

Stronger, more sustainable together

Building on a partnership spanning four decades, CommScope and Wesco help enterprise and data center customers meet the demands of a changing network environment while doing more to protect the planet and the communities they serve.

Smarter planning and forecasting

When it comes to network planning, we are relentless in our pursuit of solutions that support data-driven decisions, operational efficiencies, and enterprise flexibility. We work with you to digitally enable your supply chain and material management, helping you realize top- and bottom-line improvements.

Assessments, surveys, and audits

Factory-level planning

Aligning your material needs with our production and distribution schedules provides reliable on-time delivery while reducing inventory costs, transportation/storage carbon footprint or GHG emissions, and landfill waste.

Efficient logistics

Our expertise in supply chain logistics and a global network of 850 warehouse and distribution facilities help reduce product delivery times and accelerate your ROI.

Sustainability-based product selection

Combined, CommScope and Wesco work with over 15,000 suppliers. We expect from them what we demand from ourselves: quality products, responsive service, and a commitment to advance environmental responsibility, equality and safety.

Sustainable, innovative design

Leveraging our combined global capabilities, CommScope and Wesco help you create solutions that advance your network and sustainability goals. Through CommScope's sales engineer teams and Wesco's technology and support services team, we provide the innovative designs and technical resources to help you extend your network's lifecycle and operational utility, while reducing your material consumption and carbon impact.

SYSTIMAX® Constellation®: An edge-based power/data connectivity platform that delivers 10x more power and 5x longer reach than traditional LANs while eliminating up to 55% of the copper and up to 65% of the plastics in your network.

SYSTIMAX® Propel™: An ultra-low loss, modular structured cabling fiber platform with the capacity and agility to support multiple higher speed migrations—helping extend the network lifecycle and reduce your carbon footprint.

SYSTIMAX® imVision®: Industry-leading automated infrastructure management (AIM) solution that monitors and documents the physical layer infrastructure so you can optimize it for efficiency and reduce energy use.

Utility Grade Infrastructure: An award-winning technology assurance program and rating system that measures UL-verified beyond standards performance. It enables use of the existing cabling—helping reduce the need for new cabling, additional space and materials.

ERA®: The only all-digital, in-building distributed antenna system (DAS), ERA solution takes up less space while reducing cooling and power costs and installation requirements.

OneCell®: The intelligent indoor “super” cell eliminates cell borders and interference while requiring fewer access points and less power than other small cell solutions. OneCell devices deploy over standard Ethernet LAN cabling to reduce new cabling and installation costs.

Low-impact staging and delivery

During installation and turn-up, CommScope systems engineers and Wesco technology and support service help the process be as fast, seamless and sustainable as possible. The following are some of the services we offer as needed.

Project inventory management:

Wesco schedules, tracks and inspects every delivery throughout the project and can even help improve how you consume, deploy and procure solutions, materials and technologies.

Staging services: Wesco's off-site pre-assembly and kitting reduce costs and on-site packaging waste, while staging solutions like job trailers and mobile storage keeps inventory at the ready and keeps work areas clutter-free.

Shipping and fulfillment: We offer consolidated shipments, whole order delivery and smart fulfillment solutions.

Waste reduction: Environmentally friendly bulk and eco-packing options—as well as services like e-waste recycling and landfill diversion verification—help reduce your waste stream and advance your LEED qualification.

Empowering a brighter, more connected future

Your network is evolving at an accelerating rate, while concern over how we treat the planet and each other is growing just as quickly. The two are not mutually exclusive. In fact, the way CommScope and Wesco see it, network growth and a cleaner, kinder world are mutually dependent.

Together—CommScope, Wesco and you—we can empower a brighter, more connected future.

COMMScope®

CommScope pushes the boundaries of communications technology with game-changing ideas and ground-breaking discoveries that spark profound human achievement.

We collaborate with our customers and partners to design, create and build the world's most advanced networks. It is our passion and commitment to identify the next opportunity and realize a better tomorrow. Discover more at commscope.com.

Wesco builds, connects, powers and protects the world.

Delivering ingenuity and expertise to approximately 150,000 customers worldwide, we help your business run smoothly by providing solutions that can increase profitability, improve productivity and mitigate risk. With nearly 1.5 million products and locations in more than 50 countries, Wesco delivers what you need, when you need it. Learn more at wesco.com
