

Leading cloud providers demand best-in-class infrastructure solutions

Scaling cloud infrastructure globally, consistently, rapidly, and safely with limited environmental impact requires a partner built to deliver on these requirements.

Operate globally and execute locally

With manufacturing and continuity of supply on a global scale, Panduit has the reach to meet your cloud infrastructure needs. Wherever you are, we provide innovative solutions to support your design and deployment objectives; delivering timely, flexible, and reliable physical infrastructure that is foundational to your cloud services architecture.

Innovation is in our DNA

With 65+ years of smarter infrastructure solutions and reduced upfront costs for your Cloud Service platform.

SAVING SPACE AND ENERGY

Our high-density data center solutions maximize space utilization and optimize power consumption. Thermally validated with computational fluid dynamics (CFD) analysis ensuring an optimal design for your unique requirements and environment.

Faster deployment time

with solutions that are easy to install and reliable over time.

SAFE AND SECURE operating environment for people and places

SmartZone™ Intelligent infrastructure ensure only authorized and qualified personnel gain access to your cloud assets.

The VeriSafe™ Absence of Voltage Tester prevents possible exposure to electrical hazards at the push of a button.

40% reduction

in energy consumption with Net-Contain™ Universal Aisle Containment, reclaim 10% of existing cooling capacity, and save up to 27% OpEx.

- Carbon Footprint Reduction
- Sustainable Product Innovation
- Support for the Circular Economy
- Eliminate Waste

Environmental Stewardship

We support your sustainability efforts by pursuing environmentally sustainable practices to minimize our ecological footprint—from sustainable manufacturing processes and energy savings initiatives at our facilities, to the use of environmentally friendly materials in our products, to our world headquarters being recognized as a LEED Gold certified building.
