# Infrastructure for a Connected World

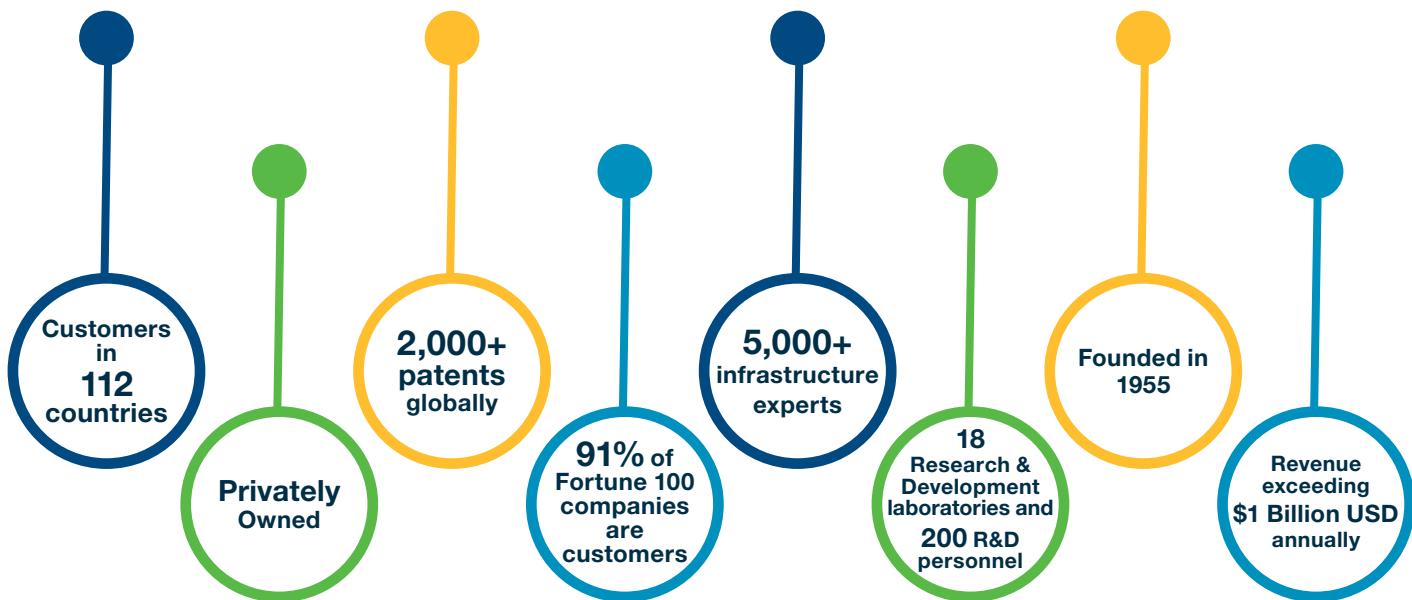

Let's face it, go-live dates never get pushed out. You need a physical infrastructure that supports last minute design changes while reducing the "book to build" time.

Panduit physical infrastructure supports network connections from the meet-me-rooms, to the network cabinets, up to the office, out to operations, and most importantly to your client areas. Partner with Panduit for best-in-class solutions throughout your data center campus that scale around the globe.

This guide is designed to make your ordering process and product selection as seamless as possible. You will find two part numbers listed for each product: one in blue, representing Panduit, and one in green, representing Wesco Anixter. Either part number can be used when placing orders, requesting additional information, or seeking assistance. Please note that some products may only have a blue part number listed. This indicates that the product is currently unavailable through Wesco Anixter. For these items, we encourage you to reach out to your local representative for further support.

## A Culture of Curiosity, a History of Innovation

From the first product, a panel conduit that gave us our name, we understood the value of thinking differently. Here's where it's gotten us:

Panduit's global support structure for manufacturing, warehousing, sales, technical, and customer service enables real-time responses within each region.

## A World of Connections

When it's your vision to connect technology, systems, and people on a global scale, you don't go it alone. That's why we built a support team that is committed to earning your trust and providing a superior customer experience the world over, and a partner ecosystem that spans the project lifecycle, from planning and design to delivery, deployment, maintenance, and operation.

## Partner Smarter

Our global network of distributors provides local inventory, product support, and logistics services so our customers can expect to receive exactly what they need when they need it.

Our **Panduit One partners** include highly skilled installers, contractors, and system integrators who are trained and certified to design, develop, and deploy high-performance electrical and network infrastructures.

# White Space Solutions at the Cage Level

Reduce time from book to bill with a single source provider of all layer 1 infrastructure solutions needs in the white space. Cabinets, power distribution, hot and cold aisle containment, low-voltage connectivity, copper and fiber cable, connectivity, thermal sealing, and grounding and bonding solutions that protect your critical connections.

## Conveyance Solutions

Segregate, route, and protect fiber optic and high-performance copper cabling from distribution areas to equipment cabinets or racks.

[Pages 12-17](#)

## Cabinets

Accelerate deployment with a next-generation cabinet with custom configurations to meet your network needs.

[Pages 18-21](#)

## Power Distribution and Management

Monitor data center power by continuously scanning for electrical circuit overloads and environmental conditions that place critical IT equipment at risk.

[Pages 22-25](#)

## Environmental Monitoring and Control

Manage risk and change with real-time data on the status of power, cooling, connectivity security, and environments to individual devices.

[Page 27](#)

## Containment

Reduce cooling energy consumption by as much as 40% and optimize the separation of hot and cold air enabling higher per cabinet density, reclaiming 10% of existing cooling capacity.

### PanMPO™ Connectors

Easily convert between male and female gender, and between key-up and key-down polarity for a standards-compliant 10G or 40G/100G Ethernet installation.

### Opti-Core™ Uniboot Patch Cords

Provide interconnect and cross-connect of network applications in main distribution, horizontal distribution, and equipment distribution areas.

### G5 Security Handle

Intelligent access control to a rack or cabinet in a data center and with real-time physical status.

### G5 Power Distribution Units

Provide transparency to true power consumption and thermal conditions at the cabinet or individual outlet level.

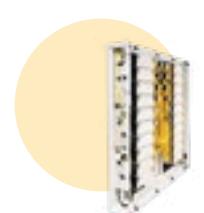

### Cable Management

Vertical and horizontal cable management, and rack solutions reduces the space required to route, manage, and protect high-cable capacities.

### Thermal Accessories

Optimize data center airflow within cabinets to protect active equipment.

### FlexCore™ Optical Distribution Frame

The FlexCore ODF is a versatile front-access cabling system that provides the necessary protection for critical connections.

### RapidID™ Network Mapping System

RapidID Network Mapping System automates the labor-intensive and error-prone cable documentation process, resulting in a faster, easier way to place and trace cables and patch cords.

# Meet-Me Room (MMR)

Meet-Me Rooms need to be designed to distribute data center traffic more cost-effectively and efficiently in a safe and secure environment. Distribution frames, splice enclosures, pathways, and fiber assemblies are the main components of the Meet-Me Room and are used to reliably transfer data from ISPs/Carriers to each tenant's cage.

## FlexCore Optical Distribution Frame Solution

Discover the FlexCore ODF, empowering you to optimize floor space, reduce risks, and simplify moves, adds, and changes (MAC).

## Opti-Core Uniboot Patch Cords

Ideal for high density applications, the Uniboot fiber patch cord features a small 2mm unitary cable with a push-pull boot that provides easier access to insert/remove without disturbing adjacent circuits.

[Page 31](#)

## PanMPO Fiber Assemblies

The only MPO products that offer the ability to quickly change polarity and gender without the need for tools. Includes a push-pull boot that enables easy access without disturbing adjacent circuits.

# FlexCore Optical Distribution Frame

Optical distribution frames (ODF's) are an all-important network element at the heart of the fiber network. Representing <5% of a typical IT project investment, high density, performance, and quality are pivotal attributes for an ODF ensuring business continuity 24/7/365.

## Offering the Ultimate in Flexibility, Manageability, Scalability, and Security

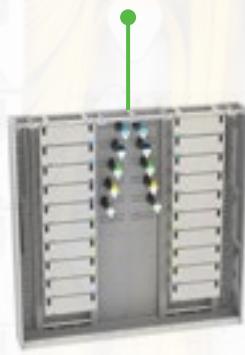

- Highly intuitive cable routing paths remove guesswork and prevents 'rip and replace' costs
- Innovative cable management and lockable vertical cable manager doors eliminate circuit risk and downtime
- Up to 3,168 fibers per frame when using standard 24 fiber cassettes
- Data center floor space can be reduced by 50%\*
- Simplifies and reduces the time for moves, adds, and changes
- Multiple form factor (width) cassettes optimize rack space across wider applications
- Patch cords consolidated to a single length – freeing up capital locked in maintaining inventory
- Multi-layer security with lock capability available at both 4 RU enclosure and ODF doors

### Common Frame Arrangements

**Single Cross Connect Frame**, recommended patch cord length 4m

**Double Cross Connect Frame**, with end panels, recommended patch cord length 4m

**Cross Connect**, four frame line-up, with end panels and over-length storage (300mm wide intermediate VCM). Recommended patch cord length between two double frames is 10m

### *Optimal Locations to Implement include:*

- ✓ Building Entry
- ✓ Meet-Me Room (MMR)
- ✓ Main Distribution Area (MDA)
- ✓ Intermediate Distributed Area (IDA)

The FlexCore Optical Distribution Frame can be installed in additional optimal locations.

**Double Cross Connect Back-to-Back**, fully enclosed. Recommended patch cord length 4m

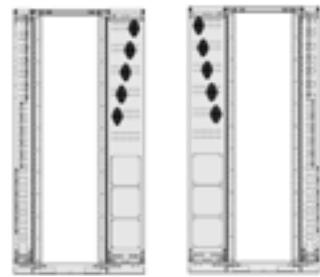

**Interconnect or Splice Through** frame with end panels

\*Assumes 4 double frames (2 double frames in a 'back-to-back' arrangement). Design conditions and configuration specifics apply.

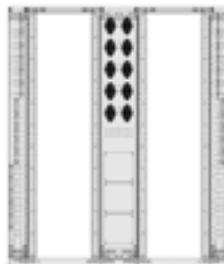

## Step 1: Select a Frame

Single Frame Cross Connect (LH)

\*Assemble as opposite hand (RH)

Double Frame (Compact) Cross Connect

Splice Through OR Interconnect

Frames are supplied with leveling feet and wall mount bracket.

150mm VCM illustrated is supplied with 4 x cable management plates

Refer to design guides for configuration specifics

VCM can be assembled for top (as illustrated) or bottom cable entry/exit.

<sup>†</sup>for a 2100mm wide double cross connect frame (where both LH + RH version is needed) double quantity shown

<sup>††</sup>Width and depth stated excludes end panel(s) and door(s)

\*Change "GY" to "BL" in part number for black.

\*\*maximum fiber capacity (stated) applies to single, double and quad (quad = double frame placed back-to-back) frame arrangements in combination with 24F LC cassettes. If using a line-up of >2 frames side by side the maximum number of 4RU enclosure is 10 off (2880F per frame) to allow bottom patch cord pass-through (trough) to be used.

# Conveyance Solutions

## Wire Basket Overhead Cable Tray Routing System

The Wire Basket Cable Tray Routing System is designed to route and manage copper data, fiber optic, or power cables within data centers, connected buildings, and industrial automation applications. Innovative features provide quick, safe, and easy assembly for reduced installation costs and faster deployment.

# Ordering Process

## Rack and Cable Management Accessories

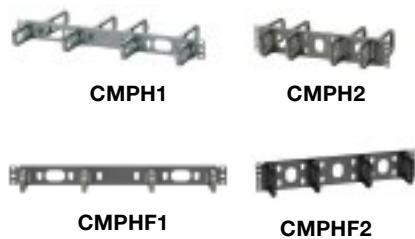

Part Number	Description	Rack Units
<b>SRBS19BL-XY 304821</b>	Strain relief bar, straight; to support and manage cable.	Black
<b>SRB19BLY 246045</b>	The strain relief bar is a metal bar that extends 70 mm from the rear of a rack and provides support to cables exiting the back of a patch panel. Optional quick release brackets enable strain relief bars to be removed and re-installed without the use of tools.	
<b>SRB19D5BL 457968</b>	The strain relief bar is a metal bar that extends 115 mm from the rear of a rack and provides support to cables exiting the back of a patch panel. Inward mounting tabs provides a wider opening. Optional quick release brackets enable strain relief bars to be removed and re-installed without the use of tools.	
<b>SRB19D7BL 432638</b>	The strain relief bar is a metal bar that extends 190 mm from the rear of a rack. An added cross bar provides support to heavier cables exiting the back of a patch panel. Inward mounting tabs provide a wider opening. Optional quick release brackets enable strain relief bars to be removed and re-installed without the use of tools.	
<b>SRBWGY 320812</b>	Strain relief bar with integrated adjustable clips; to support and manage up to 24 cables.	

## Open-Access™ Cable Management System

The Open-Access Cable Manager provides open and efficient access to power, coaxial, and communications cables. Made of a steel frame with modular plastic snap-in D-rings, the cable manager is lightweight and durable, but flexible enough to endure seamless moves, adds, and changes. It is compatible with any standard EIA 19 inch rack or cabinet. Color: Black.

## PanZone™ OverPanZone™ Overhead Distribution Rack

Part Number	Description	No. RU
<b>PZLRB6U 488260</b>	The PanZone Overhead Distribution Rack can mount to most overhead racks or cable trays, or be suspended from the ceiling in numerous configurations. This distribution rack enables the deployment of zone areas for greater scalability and quicker server deployments. The overhead rack is 6 RU, rated for 36 kg, made of steel, and is black.	6

## PatchLink™ Horizontal Cable Manager

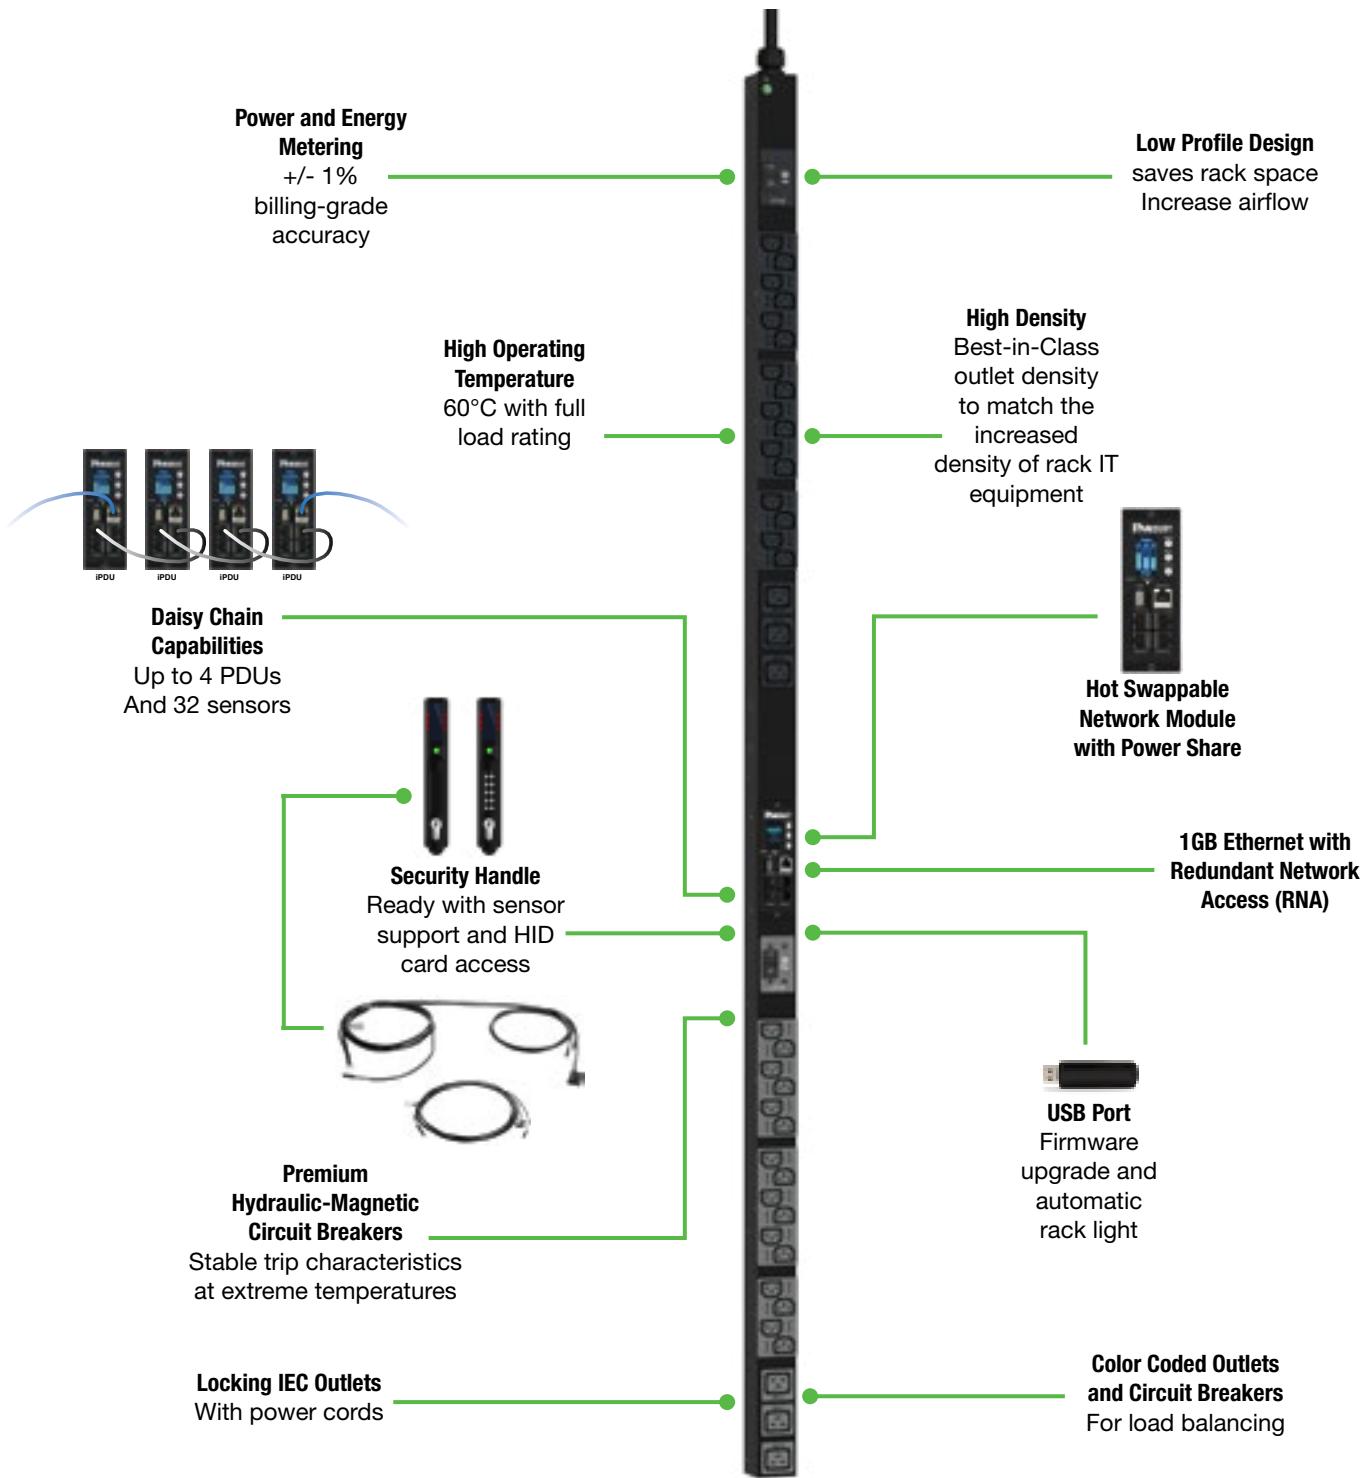

Part Number	Description	No. RU
<b>WMPSE 265696</b>	The PatchLink Horizontal Cable Manager provides a neat and efficient way to manage patch cables on any standard EIA 19" rack or cabinet. It manages copper, fiber optic, and coax cables. Flexible fingers organize patch cords, simplifying moves, adds, and changes while the "closed" design protects the patch cables in the pathway. The dual-sided cable manager is 1 RU, includes dual-hinging front and rear covers, and is black.	1

# G5 Intelligent PDUs

The G5 iPDU's monitor the data center power and the environment by continuously scanning for electrical circuit overloads and physical environmental conditions that place critical IT equipment at risk. By monitoring physical access points, the PDUs increase cabinet security to protect your systems and data. With some of the highest outlet densities and the smallest form factors available in the market, your cabinets will be functioning at their most resourceful state.

# Grounding and Bonding Solutions

## Grounding and Bonding Equipment Bonding Jumper Kit

Part Number	MCBN Conductor Size #6 – #2 AWG	Description
<b>RGCBNJ660P22 351963</b>	HTCT2-2-1	#6 AWG (16mm <sup>2</sup> ) jumper; 60" (1.52m) length; 45° bent lug on grounding strip side; provided with .16 oz. (5cc) of antioxidant, two each #12-24 x 1/2", M6 x 12mm, #10-32 x 1/2" and M5 x 12mm thread-forming screws and a copper compression HTAP* for connecting to the MCBN.

## Grounding Busbar

Part Number	Description
<b>Grounding Busbar Kits for Threaded Rail Fasteners</b>	
<b>RGRB19U 328343</b>	Grounding busbar; 19" (483mm) length; tin-plated; 20 holes arranged for flexibility in mounting with 20 #12-24 x 1/2" hex head screws installed; mounting hole sets have 5/8" (15.9mm) spacing; provided with two each #12-24 x 1/2", M6 x 12mm thread-forming screws, and two #12 flat washers for mounting.

## Grounding Strip

Part Number	Description
<b>RGS134-1Y 306469</b>	Grounding strip; 78.65" (2m) length; .67" (17mm) width; .05" (1.27mm) thickness; provided with .16 oz. (5cc) of antioxidant, one grounding sticker and three each #12-24 x 1/2" and M6 x 12mm thread-forming screws.

## Green Bonding Cage Nut Kit

Part Number	Description
<b>CNBK 372863</b>	Green bonding cage nut, includes 50 #12-24 bonding cage nuts (.06 – .11 thick panel) and 50 #12-24 x 1/2" bonding screws with #2 Phillips/slotted combo hex head (use 5/16" or 8mm socket).

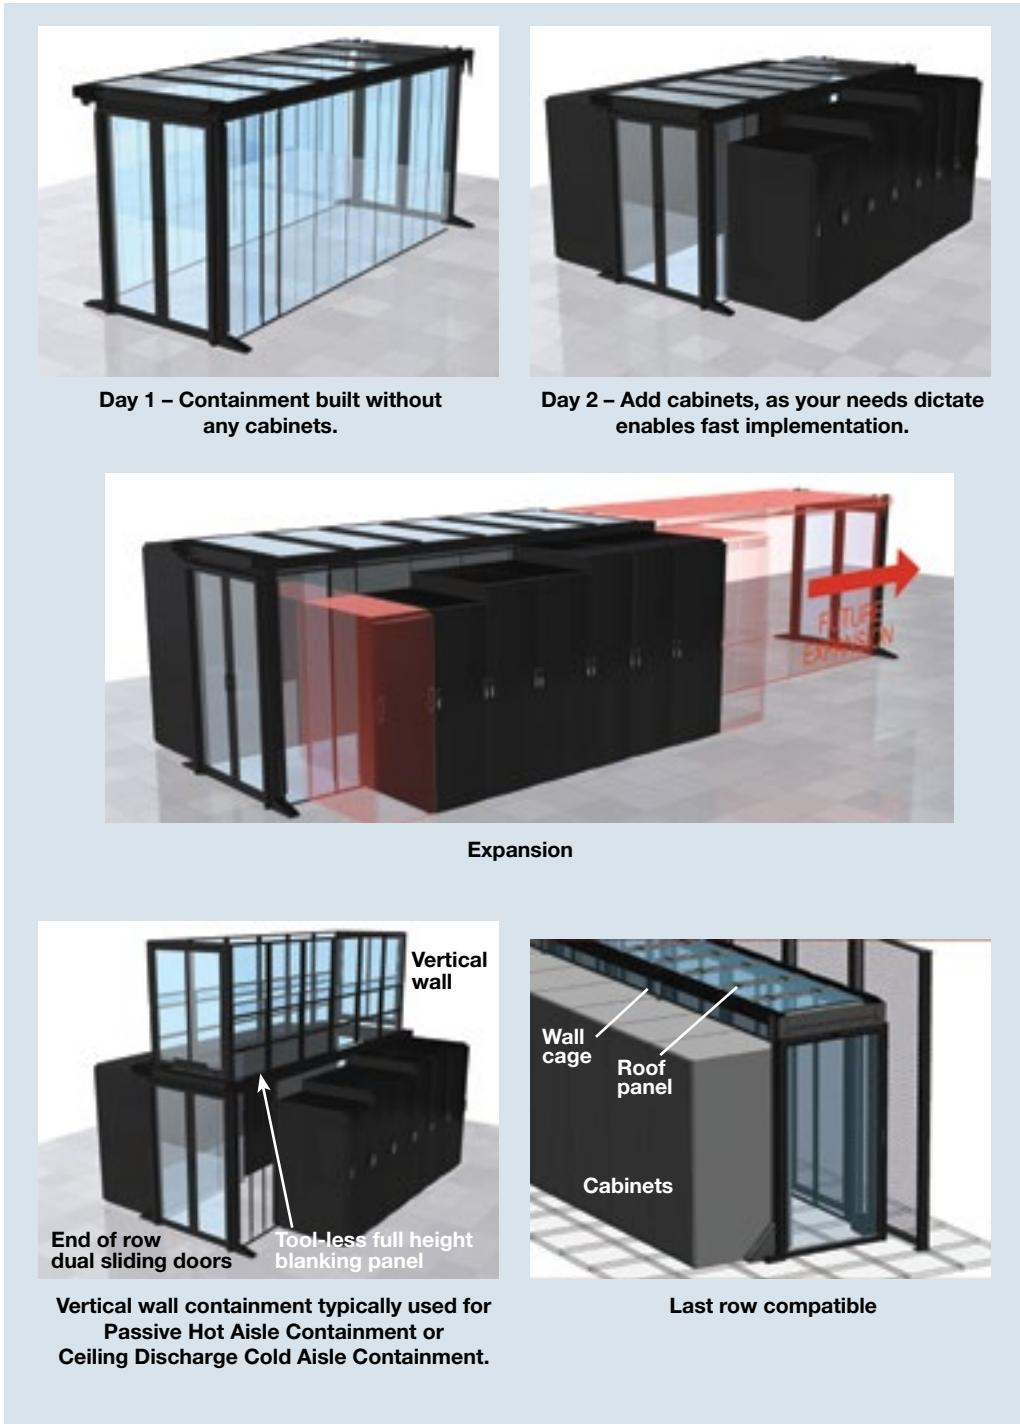

# NetContain™ Universal Aisle Containment Solutions

The Net-Contain™ Universal Aisle Containment System allows users to reclaim underutilized cooling capacity, reduce energy expense, and reduce OpEx by retrofitting their existing data center with a versatile containment system. The system includes an independent support structure, sliding doors, vertical blanking panels, and roof structure. This flexible offering can be configured in Hot Aisle and Cold Aisle containment and allows the addition of cabinets of varying sizes and design as needed, reducing deployment time and capital investment.

## Reclaim Cooling Capacity:

Retrofitting the Net-Contain™ Universal Aisle Containment System into your existing data center allows you to optimize the separation of hot and cold air enabling higher per cabinet density, reclaiming 10% of existing cooling capacity.

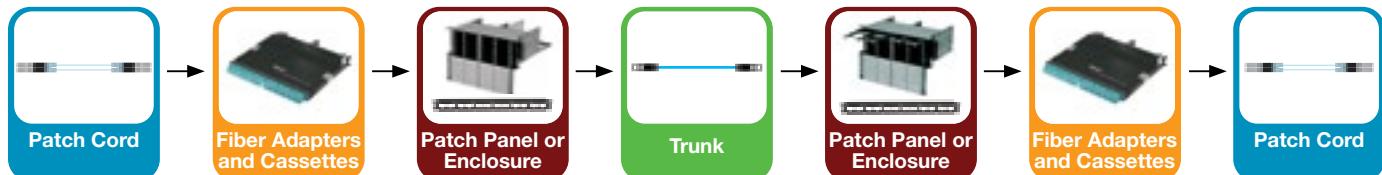

**Let us customize to your containment configuration,  
contact your Panduit Sales Representative.**

# RapidID Network Mapping System

## Cable Documentation. Automated.

Keeping track of patch cord connections can be time-consuming and labor intensive. Labeling, tracing, and troubleshooting are tedious, repetitive, and notoriously prone to human error. All this leads to wasted time, effort, and money.

The available solutions to address these issues are neither practical nor cost-efficient, until now.

RapidID is a software-enabled network mapping system from Panduit, the leading provider of network infrastructure for smart, scalable, and efficient connectivity solutions.

For network engineers and data center managers, RapidID is a practical, affordable alternative to traditional manual approaches. It does not require special panels or cabling, and is ideal for building a new telecom room, locating installed cabling, or replacing a network switch.

### The *RapidID* solution includes:

- Pre-labeled copper and fiber patch cords for easy installation and identification
- Feature-rich mobile app

Key Features	Benefits
<b>Patch cords are pre-labeled</b>	Automates labor-intensive and error-prone cable documentation process that can lead to an outage
<b>Feature-rich mobile app</b>	<ul style="list-style-type: none"><li>• Reduce time and cost of patch cord documentation by up to 50%*</li><li>• Control cost and risk associated with cable installation and management</li></ul>

# Gray Space Solutions Outside the Cage

To support data centers, the gray space consists of many products that support back-end function allowing the white space to continue to function smoothly and safely. Absence of Voltage Testers, cable cleats, switch gear, and various other products build an infrastructure that increases safety, reduces risk to workers, and saves unnecessary downtime by using innovative electrical solutions within data center gray space.

## VeriSafe™ Absence of Voltage Tester

The VeriSafe Absence of Voltage Tester minimizes risk by verifying the absence of voltage before equipment is accessed, making it easier for workers to verify an electrically safe work condition has been established in a fraction of the time compared to using hand-held portable test instruments.

## Cable Cleats

To protect electrical infrastructure when using power cables in a tray, installing an IEC 61914:2015-compliant cable cleat is the best option when facing a peak short circuit fault. Panduit cable cleat solutions were designed to withstand the stress of a short circuit event using a state-of-the-art ANSYS simulation software to model the dynamic forces at play.
