Quantum®

SOLUTIONS FOR PHYSICAL SECURITY

Security Infrastructure Portfolio Designed for Surveillance

MAKING THE WORLD SAFER AND SMARTER WITH SURVEILLANCE AND ANALYTICS

Surveillance recording and analytics are helping to make the world safer and smarter. And surveillance is everywhere—in fact, surveillance cameras are now the biggest data generator in the world.

Increasing camera counts, higher resolutions, and analytics are putting tremendous demands on security infrastructures, driving needs for more scale, more performance, and the latest technologies.

Whether you are looking for an entry-level network video recorder (NVR) for just a few surveillance cameras, or a massive shared storage deployment for tens of thousands of cameras, Quantum employs the latest technology to provide the best solution for your needs.

And every product is backed by Quantum's world-class service and support organization, which provides world-class pre- and post-sale services to our customers around the world 24x7x365.
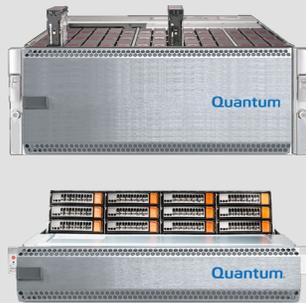

BUSINESS BENEFITS

- **Broadest Security Infrastructure Portfolio from a Global Vendor**
  From low-end NVRs, to HCI, to petabyte-scale shared storage and archiving, to analytics processing—Quantum provides solutions for any scale. And our global logistics and support capabilities mean you can rely on Quantum to deliver.

- **Best Performance, Best Density, Most Cost Effective**
  By leveraging Quantum's years of expertise in video capture and processing, combined with the latest generation server hardware, we can retain over 600 TB of footage in only 4U of rackspace.

- **Better Value for Your Investment**
  Because Quantum employs current generation server hardware and cutting-edge software, you'll get longer lifecycles and the best return on your investment.

- **Backed by Quantum's World-Class Service and Support**
  Quantum products are backed by Quantum's global support organization, providing world-class pre- and post-sale services to tens of thousands of customers around the world 24x7x365.

VS-NVR SERIES
Cost-effective network video recording servers.

VS-HCI SERIES
Hyperconverged infrastructure for surveillance recording and management.

VS-A SERIES
GPU analytics servers and application servers for access control systems and more.

SHARED AND ARCHIVE STORAGE
Scale-out file storage, object storage, tape, and cloud.

THE BROADEST SECURITY INFRASTRUCTURE PORTFOLIO – DESIGNED FOR SURVEILLANCE

For over 20 years, Quantum has been a leader in high-speed video capture, processing, and storage. Our 10,000+ customers around the world include the world's biggest broadcasters, movie studios, government agencies, and Fortune 100 corporations.

By using the latest technology and our years of expertise in high-speed video capture, we have built a portfolio of products designed for surveillance and physical security, and smart buildings.

The result is the broadest security infrastructure portfolio available from any single vendor, from low-end NVRs, to hyperconverged infrastructure (HCI), to the largest shared storage and archive solutions, to analytics processing.

This portfolio has been designed for surveillance, with the highest performance and highest density, providing the most cost-effective options on the market.
