

Robust, scalable and integrated security solutions

The power behind **your mission**

All-in-one, comprehensive security solutions for premises, property and people.

Tyco provides innovative integrated security and protection solutions for homes and businesses around the world. We accomplish this through our portfolio of brands and products – one of the most comprehensive in the industry – and deliver quality through a network of outstanding partners and trusted integrators. Tyco addresses these key security needs:

Video surveillance

Access control

Cloud solutions

Integrated solutions

Do better business

Gain a competitive advantage and boost customer loyalty by becoming their single trusted security solutions provider.

Increase your revenues

Win more jobs with an easier sell and a lower total cost of ownership.

- Add new revenue streams
- Capture more of your customers' security spend
- Faster, more profitable installs
- Reduce onsite service calls

Expand your portfolio

Partner with the industry's largest security brand's quality products, innovation and services.

- Easily expand into security applications that you don't currently offer
- Provide customers with more options and the best user experience

Optimize your customers' experience

Save time and costs for your customers using a single-touchpoint security solution with integrated access control and video surveillance.

Simplified and more effective management

- Flexible control of two platforms from both Kantech and Exacq interfaces
- Increased operator control
- Easier, single-vendor management
- Multi-platform workflows can reduce response times to critical alarms and events

Remote management and control

- Reduces visits to distributed sites
- Speedy reaction and response times

Scalability and reduced cost of ownership

- One server for multiple security applications reduces hardware, power and cooling costs
- Once one platform is installed, adding basic capabilities from another platform is cost-effective
- Ideal for any business or organization, from a single site to a global enterprise

Video Surveillance

Modern security goes beyond the standard video infrastructure. Today’s advanced technology allows operators to become the eyes and ears of buildings, enabling them to not only protect visitors and assets, but also achieve operational excellence.

Integrate Across Portfolios

Create unique, customized video systems that fit your needs

Automate Surveillance

Gather intelligence to improve daily tasks and incident response

Scale to the Cloud

Integrate access to cloud storage for critical video

Video solutions for a safer, smarter world

When you install a surveillance solution, you are looking for more than visibility. You want to alleviate concern and strengthen peace of mind in the face of day-to-day activities and unforeseen events. To achieve that, your video security system should give you the tools and confidence to protect products, places and, most importantly, people.

We are experts at incorporating video surveillance systems into a variety of environments that meet your needs, regardless of location size or safety requirements. Our video surveillance solutions help you maintain visibility across a vast ecosystem, while transforming video into actionable data and – ultimately – business intelligence.

Whether you need to optimize and streamline your current infrastructure or address mission-critical situations, we have developed enterprise-wide systems to ensure visibility, command and control.

- **Video Management Systems** with collaboration tools and seamless synchronization with access control and intrusion for greater situational awareness and enhanced operator productivity.
- **Network Video Recorders** that leverage smart video streaming, pre-defined layouts and alarms, and centralized licensing across flexible hardware options.
- **Advanced video analytics** on servers, on edge-based cameras or in cloud devices to provide ease of forensic investigation and acquisition of valuable business data where it is most appropriate for your application.
- **IP security cameras** to meet versatile installations that require advanced recording features and open-platform integrations.
- **Analog migration solutions** using hybrid network video recorders and a vast support network of professionally trained engineers and integrators.

tyco | Exacq

From small, single-camera systems to large, scalable deployments with thousands of devices, the Exacq portfolio provides an ideal security solution for almost any application, particularly those requiring an uncomplicated installation process and intuitive user experience.

The exacqVision product line is well-known for its simplicity and flexibility. Compatible with more than 1,900 IP camera models and a large number of access control systems, point-of-sale (POS) systems, and retail and video analytics, the exacqVision VMS is one of the industry’s most flexible solutions.

tyco | Illustra

Illustra cameras provide a versatile and scalable surveillance solution for deployments where advanced video intelligence, innovative recording features, and open platform integrations are required.

Illustra IP network cameras feature premiere video intelligence and technology that maximize resources and improve overall performance. Powerful on-board camera analytics distribute the load between the camera and the video management system while triggering events to be utilized for real-time alerts, forensic analysis, or useful business data.

A tiered approach scaling from single-site deployments to multi-location installations allows Illustra to provide a solution for a variety of workplaces and industries.

Access Control

Access control is the first and most powerful component of facility safety and security. We offer a comprehensive array of access control platforms, solutions and products.

Flexible and Customizable

Tailored solutions for enterprises of any size and requirements of any kind

Innovative Technologies

Biometrics and other high-assurance solutions

Intelligent and Connected

Remote monitoring improves efficiency, security and operations

Access control solutions from Tyco and our associated brands serve a wide range of security use cases, from standalone buildings to complex global enterprises. Our innovation means we make access control systems that go well beyond security to enhance building efficiency and operations.

- Scalable access control solutions for enterprise environments of every size
- Control access for employees, visitors and contractors
- Powerful and highly encrypted door controllers
- High-assurance systems, biometric readers, and multi-factor authentication for critical locations and assets

- A systems-approach philosophy to minimize disruptions and ensure reliability
- Mobile applications enable remote monitoring – anytime, anywhere
- Seamless integration to interconnect a growing portfolio of security, fire, business and building systems
- Cybersecurity coordination to manage risk associated with access control
- Solutions that go beyond security to provide cyber resiliency, business efficiency, and intelligence

Serving small- to medium-sized businesses, Kantech provides integrated access control technologies that are reliable, easy to install, and scalable. Its flagship solution, the EntraPass access control software and KT controllers, enable more simplified configuration and robust reporting to enhance the user experience.

Cloud Solutions

Today's physical security solutions live in the cloud and they bring all the typical benefits associated with any digital transformation.

- **Centralized management:** Control cameras, doors, alerts and permissions across all your buildings from one browser or mobile device, all around the world.
- **Scalable operations:** An unlimited number of cameras and access control points can be added to a single instance. Custom floor plan views, map views, and powerful dashboards help keep data organized for one or thousands of locations.
- **Faster intelligence:** With the cloud, sharing information has never been faster. This increase in speed and accessibility transforms video surveillance footage from forensic data into actionable information that can be quickly distributed across entire organizations.
- **Streamlined costs:** Organizations typically see a 20-30 percent reduction in the total cost of security by moving expensive on-premises security infrastructure to the cloud.

Cloudvue

We invented cloud video surveillance in 1999 and have been continuously innovating and pushing the boundaries of cloud technology ever since we started. This makes us the leading experts in cloud video surveillance and gives Cloudvue a proven track record for reliability.

Today, thousands of businesses and organizations trust Cloudvue to simplify surveillance, streamline access control and provide powerful intelligence that improves security operations and helps with organizational efficiency.

Learn more about Cloudvue's 20 years of cloud video surveillance and security technology innovation at www.cloudvue.io.

Global industries

We understand the complexity of security needs within different industries. That’s why we are experts at incorporating security systems into a variety of environments that meet your needs, regardless of location size or safety requirements. Whether you need to optimize and streamline your current infrastructure or address mission critical situations, we have developed enterprise-wide systems to ensure visibility, command and control.

Aviation
Addressing the security needs of passengers and staff

Government
A recognized leader in addressing government safety and security challenges

Commercial and industrial
A leader in advancing workplace safety and protecting business assets

Healthcare
Solving the safety and security challenges of the healthcare industry

Data centers and IT services
Addressing key physical security challenges

Oil and gas
Meet stringent health, safety and security regulations

Education
Securing students, staff, and valuable assets in education

Ports, maritime and transportation
Protecting against a wide range of threats

Finance
Smarter ways to protect your banking and financial infrastructure

Residential
Safeguard your loved ones and valuable assets

Gaming, sports and leisure
Where fun meets safety

Retail
Protecting people and assets at retail locations across the globe

Worldwide we protect:

Transportation systems on **5 continents**

37% of the world’s top 100 retailers

> 2 million commercial enterprises

Thousands of students in **900+** schools

42% of the Fortune 500 companies

Cyber Solutions Product Security Program

The threat to the reputation of the electronic security industry and, more importantly, potential customer losses, have fully justified the significant efforts made by Johnson Controls design engineers to ensure security solution credentials are our priority.

The Johnson Controls Cyber Solutions Product Security Program takes on board feedback from IT, security professional and cybersecurity experts to combine best practices during the product development, testing and evaluation processes. They also develop configuration guidelines for compliance to protect our physical security products from attack, damage, disruption, unauthorized access or misuse.

This holistic, organization-wide approach provides peace of mind with cyber-resilient systems focused on your security needs.

- Tailored for the unique needs of buildings
- Lifecycle management for every phase – design, deployment and maintenance
- Secure product development
- Daily tracking of potential threats
- Rapid incident response and notification
- Investment in continually evolving capabilities
- Protection for your data and privacy
- Supported business continuity

Do better business with
pre-integrated,
best-of-breed security.

About Johnson Controls

At Johnson Controls (NYSE:JCI) we transform the environments where people live, work, learn and play. As the global leader in smart, healthy and sustainable buildings, our mission is to reimagine the performance of buildings to serve people, places and the planet.

With a history of more than 135 years of innovation, Johnson Controls delivers the blueprint of the future for industries such as healthcare, schools, data centers, airports, stadiums, manufacturing and beyond through its comprehensive digital offering OpenBlue. With a global team of 100,000 experts in more than 150 countries, Johnson Controls offers the world's largest portfolio of building technology, software as well as service solutions with some of the most trusted names in the industry.
