

Wire and Cable Solutions and Services for Construction

Wesco offers electrical contractors and industrial customers a suite of services designed to support your projects during installation to reduce labor, mitigate risk, speed installation and minimize scrap while increasing safety and financial leverage.

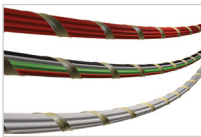

Project Execution Solutions

Wesco has developed many cabling solutions for many applications and cable types. Our representatives can map the best solution to your specific needs.

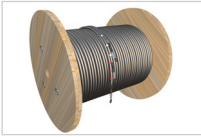

- Increased financial leverage
- Minimize scrap
- Optimize labor
- Minimize injury risk
- Mitigate risk
- Speed installation

Paraspin allows different diameters of cable to be pulled simultaneously by using independent spinning chambers.

Speedpull bundles multiple numbered circuit conductors, so they can be accessed in a single pull.

Paraplex reduces the amount of reels at the job site by bundling of two or more cables paralleled on the same reel.

Insta-reel consists of a standard wooden reel that has oversized flanges attached to both sides and becomes a payout stand when chocked in place.

LV and MV pulling eyes (Low-voltage and medium-voltage) eliminates on-site termination by having low or medium voltage pulling eyes installed by Wesco.

Slim-spin is designed to simultaneously pull multiple cables for indoor applications. At only 32 inches wide, the Slim-spin easily fits through standard 36-inch doorways.

Low-voltage cable cart is ideal for installing cables such as Category 5 and 6, security cables, door lock cables and other low-voltage communications cables.

Solar Insta-reel was designed to pull the positive and negative PV Feeder Cables. Eliminates the need for jack stands or cable trailers at the job site. Cables are cut to exact circuit length and can have pulling heads pre-installed.

Ingenuity delivered.

Wire and Cable for Every Application

Wesco stocks wire and cable for standard and specialty applications. From common building wire cables to specialized critical environment cables. We cut most cables to your specific lengths which reduces waste and labor cutting cables on site.

Products Available:

- Armored cables
- Automation cables
- Battery cables
- Building wire (THHN, HXXW)
- Communication cables
- Control cables
- Fiber optic cables
- Grounding wire
- Instrumentation cables
- Lead wires
- Low voltage cables
- Medium-voltage cables
- Metal-clad cables
- Mining cables
- Portable cord
- Power cables
- Shipboard cables
- Solar cable
- Thermocouple
- Variable frequency drive
- Welding cable

In 2023 we sold enough cable to circle the globe more than ten times. Leverage our knowledge and inventory to realize better outcomes.

Application and Engineering Resources

Wesco not only stocks wire and cable, but we also support you with application and engineering assistance.

Wire and Cable Engineering Services:

- Assist in interpreting codes and standards
- Cable sizing to meet load conditions
- Design custom cables
- Develop, review, and update cable specs
- Lubricant application and quantities
- Provide installation recommendations
- Pulling calculations
- Rigging recommendations
- Routing and layout planning

Wesco offers a wide array of wire and cable solutions and services to help you execute your projects on time and under budget.
