PROFESSIONAL AUDIO/VIDEO SOLUTIONS FOR END USERS
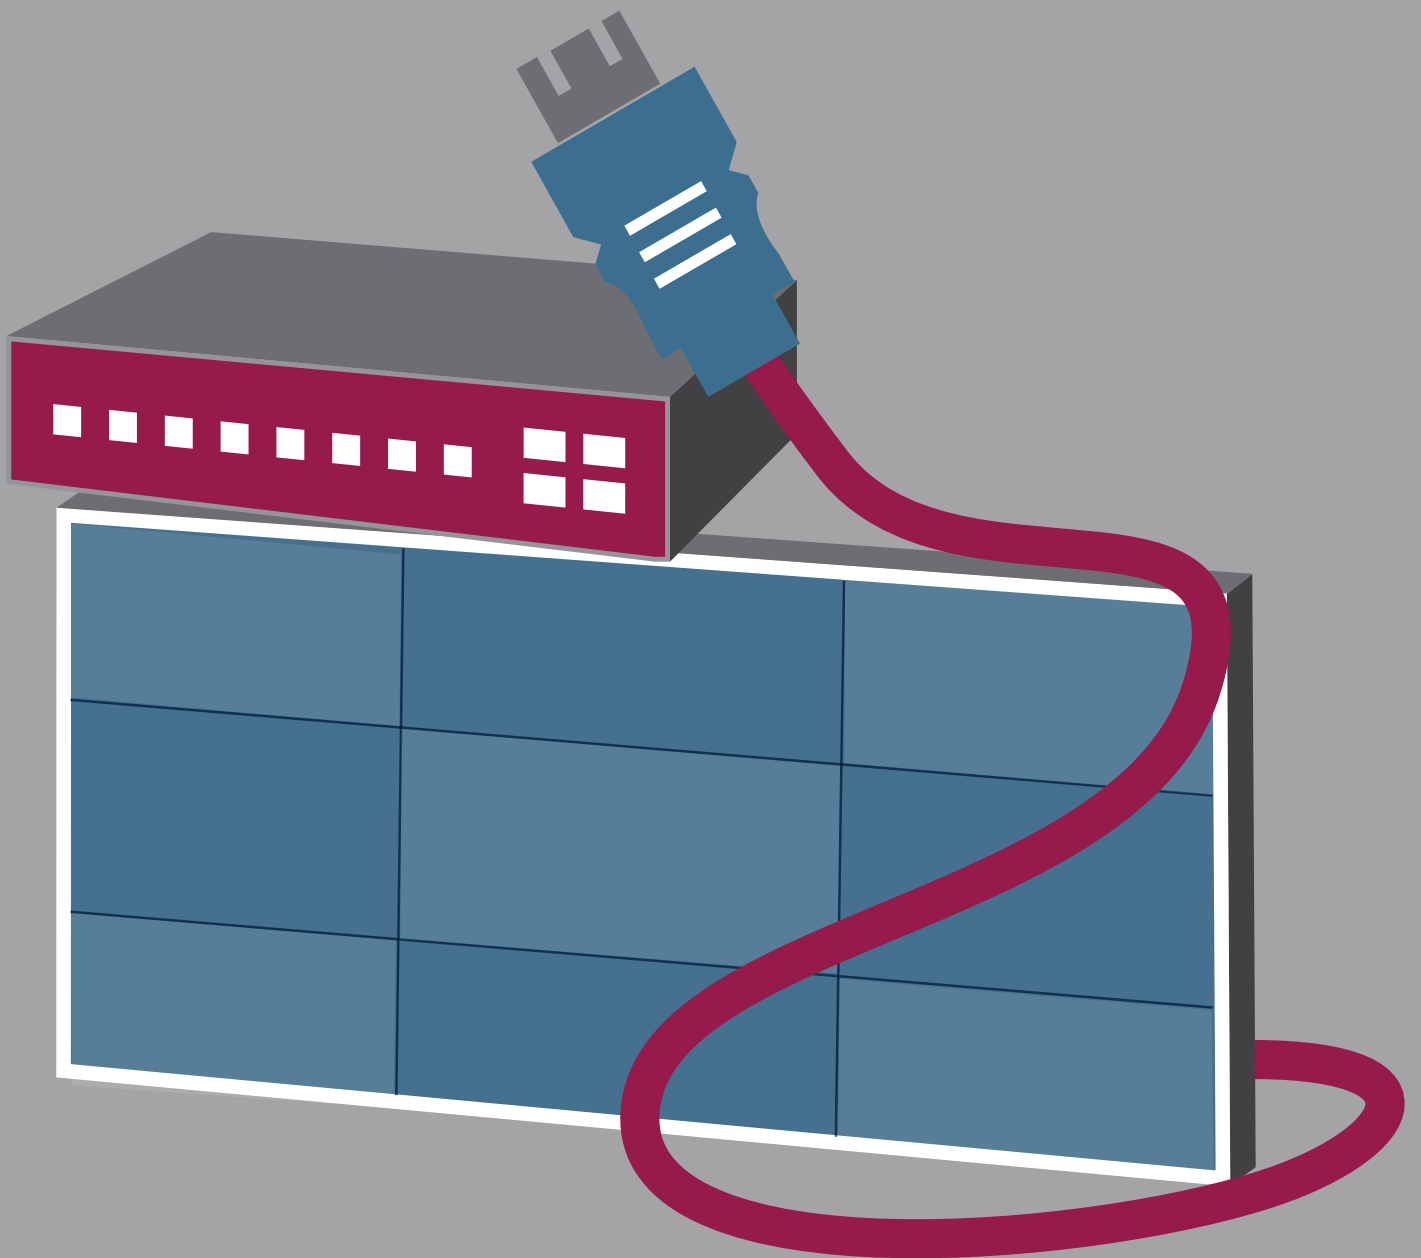

THE ANIXTER DIFFERENCE

At Anixter, we help build, connect, power and protect valuable assets and critical infrastructures. From enterprise networks to industrial support and supplies to video surveillance applications and electric power transmission and distribution, we offer full-line solutions—and intelligence—that create reliable, resilient systems that can sustain your business and community. Through our unmatched global distribution network, supply chain management expertise and technical know-how, we drive efficiency and effectiveness to benefit your bottom line.

WHAT IS DRIVING ENTERPRISES TO INVEST IN PRO A/V TECHNOLOGY?

AV over IP is now mainstream technology.
- Responsive, real-time content can be controlled and automated through web apps, smart programs, sensors and data feeds.
- Converged A/V systems leveraging HDBaseT-IP and SDVoE standards can transmit ultra-high definition audio and video over IP while minimizing bandwidth demands and latency.
- Wireless and plug-and-play digital components can simplify installation and maintenance.

**Expectations for brand experiences are higher than ever.**
- The average consumer owns 1080p high-definition displays at home; brands can capture attention with 4K/Ultra High Definition (UHD) video on extra-large displays and video walls.
- Customers and employees can visit any location of a business and receive a consistent brand experience, from the music and signage to the control interfaces.

Global and mobile communications must be supported.
- Presenters can present from their mobile devices quickly and easily in wireless-enabled conference rooms.
- Cloud-based video conferencing and interactive webinars can bring individuals in different locations together for real-time discussion and collaboration.
- Content for networked digital signage and mass notifications can be managed centrally in the cloud to deliver timely, targeted messaging to any location.

COMPLETE PRO A/V SOLUTIONS

Professional audio/video solutions are essential to today's workforce and consumers. As the trend toward global, media-rich and increasingly mobile communications continues, modern enterprises require complete integrated IP-based A/V systems that include digital signage, sound and paging, collaboration and conferencing, infrastructure and control.

ANIXTER UNIVERSITY

Anixter University online courses are provided at no cost to you and are tailored to suit your learning requirements, with standards-based instruction delivered in a straightforward, unbiased way.

Our curriculum includes material focused on professional A/V as well as structured cabling and physical security.

All of our courses are available on demand for individuals or via webcast or live seminars for groups, and includes a test to ensure comprehension and completion.

Your technical staff can earn CTS Renewal Units and BICSI Continuing Education Credits online to help fulfill certification requirements.

INTRODUCTION TO PROFESSIONAL AUDIO/VIDEO SYSTEMS

BICSI CEC: 1; INFOCOMM RUs: CTS –1.5, CTS-D–1.5

Duration: 90 minutes

This course examines the component and design considerations for professional audio/visual systems in a commercial building environment. The course introduces current and emerging standards within the audio/video industry. The following topics are covered in the course:

- Professional A/V system and industry definition
- Current and emerging A/V industry standards
- User environment design considerations
- A/V systems, subsystems and components
- Professional A/V system applications

Upon completion of this course, students will have a basic understanding of the considerations necessary in the design of a professional A/V system and will be prepared to begin the design discussions within their organization. This course requires the successful completion of a knowledge assessment, after which a completion certificate eligible for CEC transcript submission will be issued to the student.

HOW WE CAN SIMPLIFY YOUR TECHNOLOGY DECISIONS

Technical Support

With 2,700 technical experts available on-call, Anixter has the knowledge to help specify products and technologies for complete IP A/V systems. We pioneered the specifications that became the Category standards, and we sit on industry standards committees, including AVIXA, HDBaseT and SDVoE, in order to keep you informed of the latest technologies, best practices and trends.

Solutions Labs

Anixter's Infrastructure Solutions Lab℠ provides product evaluations, interoperability testing and proof-of-concept demonstrations for customers. With additional Solutions Briefing Centers in the U.S., U.K. and Brazil, you can always bring your key decision makers and contractor/integrator partners to an Anixter facility to validate your technology decisions.

Integration Partners

Through our EDGE global business partner network, we connect customers with qualified contractors and integrators for A/V system design, deployment, commissioning and maintenance.

COMMERCIAL BUILDING
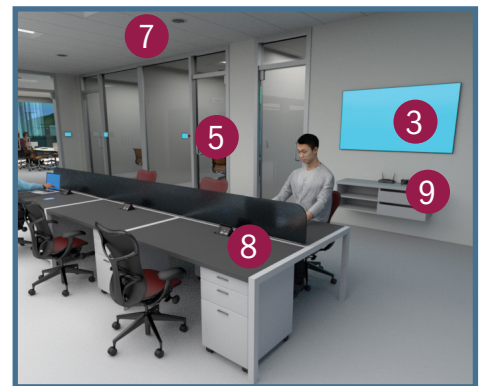

WHAT WE SELL

1. Cameras
2. Codec
3. Flat Panel Displays
4. Microphones
5. Room Booking Hardwares
6. SIP Clocks
7. Speakers
8. Table Top Boxes
9. Wireless Presentation

Not Pictured

- Connectivity
- Furniture, Racks and Cabinets
- Power Systems
- Signal Distribution and Switching
- Structured Cabling
- Control

RETAIL AND RESTAURANT

WHAT WE SELL

1. Flat Panel Display
2. Kiosks
3. SIP Clock
4. Speakers
5. Video Walls

Not Pictured
- Connectivity
- Furniture, Racks and Cabinets
- Power Systems
- Signal Distribution and Switching
- Structured Cabling
- Control

PRIMARY, SECONDARY AND HIGHER EDUCATION

WHAT WE SELL

1 Cameras

2 Flat Panel Displays

3 Infrared Microphone

4 Projectors
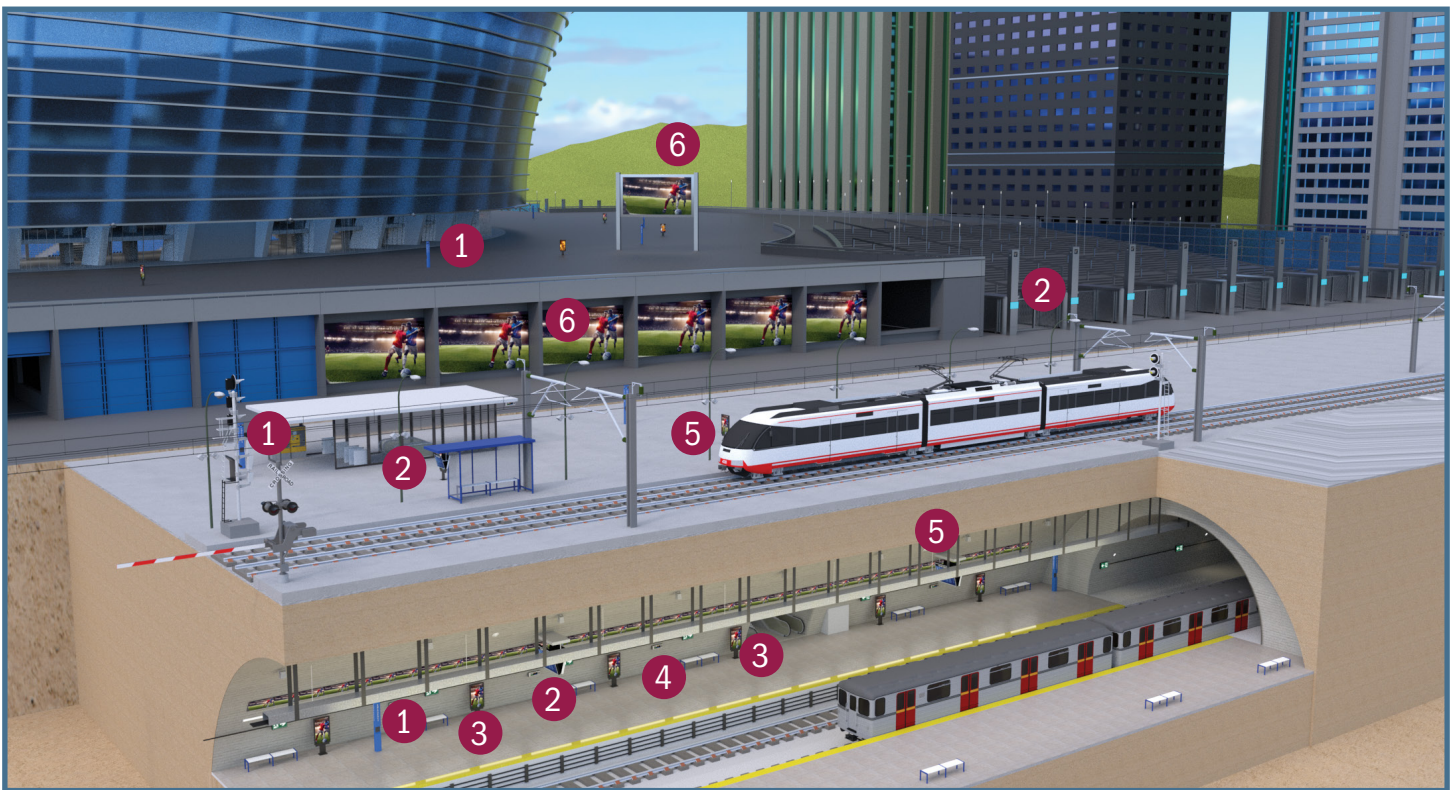

5 Screens

6 SIP Clocks

7 Speakers

8 Wireless Presentation

Not Pictured

- Connectivity
- Furniture, Racks and Cabinets
- Power Systems
- Signal Distribution and Switching
- Structured Cabling
- Control

PUBLIC VENUES
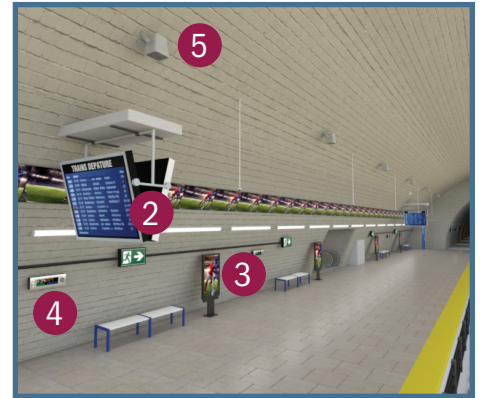

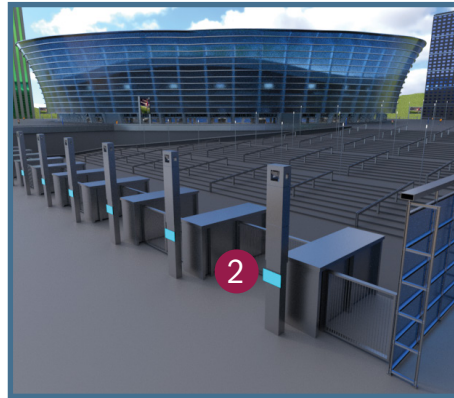

WHAT WE SELL

1. Emergency Telephones
2. Flat Panel Displays
3. Kiosks
4. SIP Clocks
5. Speakers
6. Video Walls
