Wesco Anixter

We build, connect, power and protect the world.

Ingenuity delivered.

The World Is Changing

In today's business environment, market complexities are greater than ever. Supply chain continuity constraints, inflationary pressures and skilled labour shortages are challenging. Increased project complexity and technology convergence complicate projects. Meeting environmental and regulatory requirements and addressing health and safety concerns are also top of mind.

At the same time, industry trends drive change at an ever-increasing rate.

The demand for electrification is growing at twice the rate of overall energy demand driven by transport, connected devices and data systems protection.¹

An estimated \$3.5 trillion will be invested in infrastructure over the next five years to deliver 5G technology for the connected world.²

The number of IoT devices is forecasted to almost triple from 8.7 billion in 2020 to more than 25.4 billion worldwide by 2030.³

The smart grid market is expected to triple in size from 2019 to 2026 due to smart cities, advancements in digital network infrastructures, adoption of e-vehicles, and higher penetration of AI, IoT and automation.⁴

As your strategic supply chain partner, Wesco Anixter helps you navigate these industry trends successfully.

We Help Life Run Smoothly

As a leading provider of business-to-business distribution, logistics services and supply chain solutions, Wesco Anixter is ready and able to help you navigate business complexities.

We serve those who drive productivity and progress, meeting business challenges with innovation and solutions that keep our world running and advancing.

For 100 years, our combination of scale and local expertise has provided focus and speed to transform the way you do business and, in turn, the way people work and live.

Expertise Wherever You Operate

With locations in over 50 countries, we serve you with the continuity and quality you trust, wherever your business takes you. We proudly support approximately 140,000 customers worldwide.

As your partner, you gain access to our broad portfolio of nearly 1.5 million products from approximately 45,000 suppliers.

Automation | Broadband | Electrical | Electronics
Lighting | MRO | Network Infrastructure | Pro AV
Renewables | Safety | Security and Door Locking
Utility | Wireless | Wire and Cable

One of the Deepest and Most Innovative Portfolios in the Industry

With industry-leading brands, an unmatched services portfolio and deep industry expertise, we provide you with seamless end-to-end support from concept, to design, to deployment.

Delivering Expertise to Benefit Your Business

Increase Profitability

Completing projects on time and on budget is your top priority. Our dedicated teams can help improve installation and project readiness to benefit your bottom line. Leveraging flexible service models, we can reduce CAPEX while addressing compliance and local standards.

Improve Productivity

With the right supply chain partner, you can free employees to focus on business-critical functions. Engage with Wesco Anixter's technical experts to optimise designs, utilise our tailored contract administration program and benefit from our suite of e-business solutions.

Mitigate Risk

Protect your most important assets – employees, customers and processes. With access to the world's most respected and trusted product brands and Wesco Anixter's supply chain expertise, we can help strengthen your supply chain resiliency.

Your Partner in Innovation

An Innovation Ecosystem

Through continual collaboration and innovation, we meet our customers' and supplier partners' evolving needs. We partner with you to find better ways of working.

Our innovation ecosystem enables co-creation across:

Big data

Connected solutions

Extensible frameworks

Marketplaces

Digital products

Leveraging Emerging Technology

By harnessing emerging technologies, we deliver transformational solutions with real-world value.

Electrification, Green Energy and Grid Modernisation:

Electric vehicle charging networks, data system protection, connected devices and sensors, lighting and energy management, smart metering, grid management

24/7 Connectivity:

Digital network infrastructures, real-time inventory visibility, critical materials tracking, supply chain optimisation and risk mitigation, broadband program management

Automation and IoT:

Connected solutions enabled by artificial intelligence and machine learning drive deeper insights and support process automation, energy management, occupancy intelligence, environmental assurance, security, safety and centralised building control

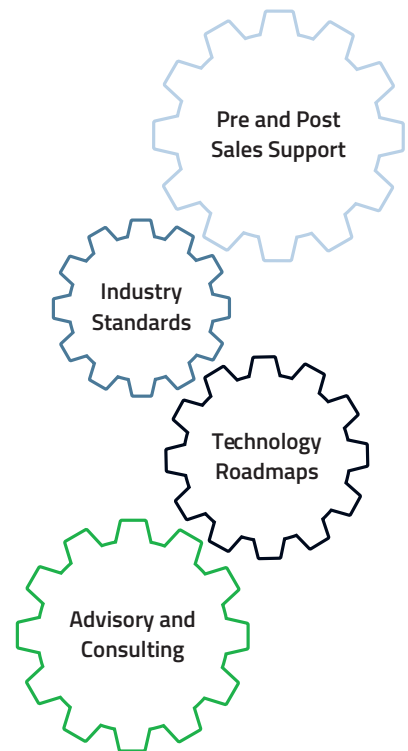

Global Technology Services and Support

With deep domain expertise, our technical specialists and engineers help you harness information for data-driven intelligence and better business outcomes. Our team has expertise in connected devices and IoT, network infrastructure, sensors, wireless, cloud and edge computing, broadband, 5G and wireless.

Consulting and Advisory Services:

- IoT consulting
- Digital solutions consulting
- Technology roadmap and specification development
- Solution and application engineering
- Proof of concept (POC) testing
- Application drawings
- Codes and standards interpretation
- Installation recommendations and technology testing
- Education and training

Wesco Anixter delivers smart, connected solutions from ideation to realisation.
