Security Solutions for Retail

Expertise To Support Your Security Needs

Globally, the retail industry provides goods and services directly to consumers. Whether you operate from a physical location, online store or mobile storefront, products like food, clothing, jewelry and books are valuable inventory that must be secured. Physical security systems can provide insight and mitigate risk. It is important to consider sensors, surveillance cameras, access control and alarm systems to improve loss prevention and reduce theft, recover stolen merchandise, reduce retail shrinkage and improve customer experience. The implementation of these solutions will allow you to analyze incidents and identify potential patterns across store locations in multiple geographies. Wesco Anixter's security experts can help discover, design and deliver solutions to keep your retail employees and customers safe and secure.

Comprehensive Solutions

- Access control
- Audio/visual
- Fire and safety
- Intrusion detection
- Locking solutions
- Video surveillance
- Servers and storage

Services

- Advisory services
- Installation enhancement
