

FULL POWER UTILITY SOLUTIONS

Power utilities must provide reliable service in the face of unique and varied challenges, from mitigating rising fossil fuel costs and low load growth to addressing CIP standards and aging infrastructure. To build and maintain safe, resilient and profitable gas and electric utilities, energy providers, EPCs and utility contractors partner with Anixter, the leading power distributor in North America, for full-line solutions spanning every facet of the business, from utility administration and infrastructure to pole line hardware and metering.

The Anixter Difference

Offset rising fossil fuel costs and minimal load growth through an integrated supply model. Anixter offers not only the broadest utility portfolio in the industry but the extended product offering and expertise to meet all of your security, data center, network and control, lighting, MRO, power, wire and cable needs.

Address power, safety and security requirements and CIP standards with complete technology solutions presented from a manufacturer-agnostic perspective by Anixter's utility experts.

Remove time, expense and risk from your operations with customizable supply chain services, from storm kitting to turnkey yard management, and have inventory ready when you need it through Anixter's expansive North American footprint.

Gain access to referrals and vetted partners with Anixter's global ecosystem of integrators, contractors, EPCs, manufacturers, standards bodies and internal experts.

We are the only power distributor that provides full-line solutions for:

- Gas and electric utilities, including investor-owned utilities, co-ops, municipalities, government, generation and transmission (G&T) entities
- Engineering, procurement and construction (EPC) firms
- Utility contractors and security integrators

Utility Expertise

Anixter has dedicated experts who understand and can address the various power, safety and security challenges that utilities face, from system interoperability to the move from reactive toward proactive and predictive security strategies.

- Advanced metering infrastructure
- Meter data management
- Control room and operations center
- Physical security systems
- Thermal/thermographic solutions
- Full data center and network solutions
- Supervisory control and data acquisition
- Distribution automation
- Complete lighting solutions (LED solutions) and design services
- Meter installation and change-out services
- Inspections and tests on products
- Tool applications and training
- Product safety training services
- Safety and compliance
- Diversity partner ecosystem

Supply Chain Solutions

Our customizable supply chain services for utilities eliminate costs, address reliability requirements and enhance safety, efficiency and profitability.

- Materials management and disposition
- Third-party materials management for utility contractors
- Critical spares management
- Custom warehouse services
- Material packaging QA/QC
- Storm/event kitting
- Turnkey yard layout and management
- Remote inventory tracking
- Automated inventory solutions
- Wire and cable management solutions
- Customized metrics and reporting
- E-commerce

SOLUTIONS FOR EVERY UTILITY ENVIRONMENT

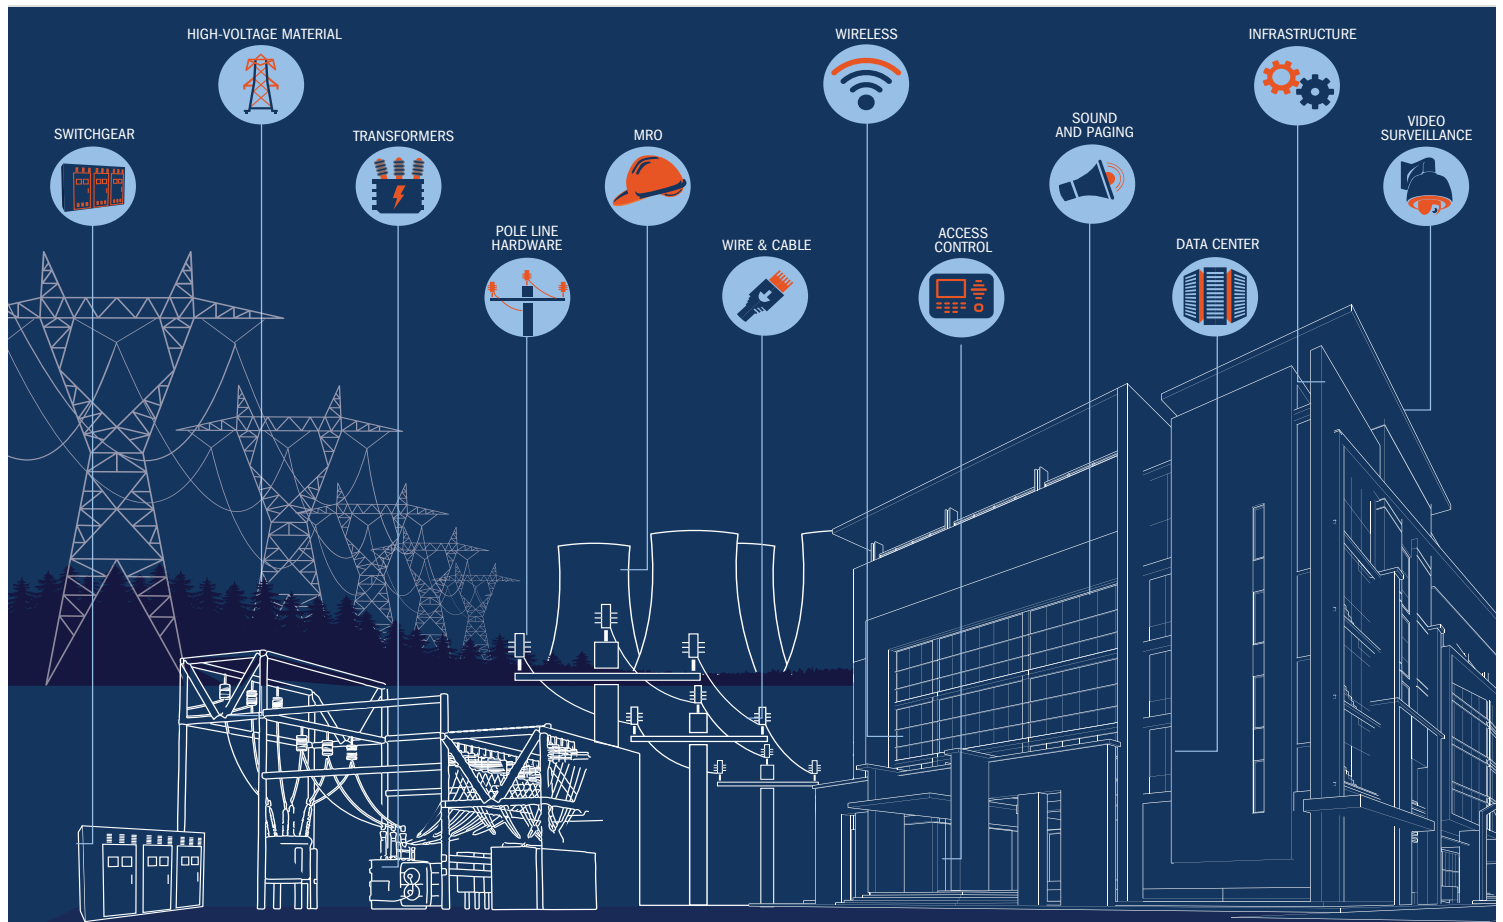

- 1 Around the perimeter and at the substation
- 2 Power generation, transmission and distribution environments
- 3 Critical security operations center
- 4 Operational center and backup data center
- 5 Corporate headquarters

Products

Anixter carries more than 300,000 products for utility customers.

- Access control
- Alarms, horns, signaling devices
- Conduit, cable tray, boxes and fittings
- Controls, relays, pushbuttons, fuses
- Copper and fiber data center infrastructure
- Electrified door hardware
- Enclosures, wireway, raceway
- Emergency telephones
- Fasteners, cable ties
- Fiber/FTTX solutions
- Fire systems
- Fuses, cutouts and safety devices
- HMI, power line controllers
- Industrial communications and control
- Insulators and arrestors
- Intrusion detection
- Lamps, lighting fixtures and controls
- Mass notification
- Mechanical door hardware
- Metering components, sockets and switches
- Molded rubber products and connectors
- MRO and safety products
- Pads, pedestals and enclosures
- Poles, structures and substation connectors
- Professional audio/visual solutions
- Smart grid solutions, metering and communications
- Sound, paging and intercom
- Switchgear, panel and switchboards, busway
- Terminals, wiring devices, connectors
- Thermal and thermographic solutions
- Transformers, power supplies
- Video surveillance
- Video walls
- Wire and cable (electrical and electronic, low-, medium- and high-voltage)
- Wireless solutions
