

## COMMERCIAL LIGHTING SOLUTIONS AND SERVICES

Deploying an energy-efficient lighting solution is one of the simplest, most cost-effective ways to improve efficiency and reduce energy and maintenance costs. With the addition of sensor technology, a lighting system can become a powerful tool for gathering data, optimizing space and power usage, and enhancing end users' comfort and safety.

Anixter offers an extensive portfolio of products and services for indoor and outdoor lighting throughout the United States and Canada, from office buildings, retail spaces and campuses to large-scale multi-family buildings. With decades of design and deployment expertise, we know lighting inside and out, from the luminaires to the cabling infrastructure. Our certified lighting specialists will work with you throughout the design, product selection, procurement, installation, testing and commissioning to ensure that your new build or retrofit lighting project meets Illuminating Engineering Society (IES) requirements and is deployed on time and under budget.

### Products

- Lighting controls and sensors
- Lighting fixtures
- Outdoor and area lighting fixtures
- Lamps, ballasts and LED drivers
- Wiring and interconnection devices
