Wesco Anixter Complete Technology Solutions

Professional AV

Collaboration and Conferencing Solutions

The new normal of a hybrid workforce requires that employees be able to communicate no matter where they are located. Whether completely remote, hybrid or in-office, your business can benefit with upgraded collaboration and conferencing technologies to keep everyone working efficiently.

Wesco Anixter offers a complete suite of technology solutions to help solve your most pressing challenges and improve your bottom line by enabling technology selection, systems interoperability and project deployment.

Common Challenges

- Specifying budget conscious systems
- Enabling component compatibility
- Maintaining network security
- Seamless integration and networking
- Ensuring ease of use for operators

Components of Your Complete Technology Solutions

Presentation	Utilises digital displays and devices to reinforce messaging while presenting in front of a group
Content Collaboration	Allows sharing and editing of content from multiple devices on the same display
Audio Conferencing	Enables multiple people to communicate over one speaker in the same room
Video Conferencing	Enables multiple people to communicate over video in the same room
Structured Meeting Systems	Provides centralised control in a parliamentary-style meeting, as well as simultaneous translation and document-sharing
BYOD	Enables the use of laptops or mobile devices to present content

> **"For today's knowledge workers, work is no longer a destination, but an activity that they expect to be able to do whenever and wherever they are."**

We Help You Address Common Challenges

- **Budget**
  A number of conferencing solutions are available in a range of price options. To define a solution that meets your needs and stays within your budget, you must go through a needs-versus-wants analysis to ensure that you do not overspecify the requirements of the room.

- **Component compatibility**
  Selecting products that work together is essential to a smoothly functioning collaboration and conferencing system. To achieve this, engage a qualified integrator to help ensure compatibility.

- **Security**
  Collaboration and conferencing applications typically run on the network, which makes them a potential entry point for cyber attacks. Follow industry encryption standards to secure your system.

- **Integration and networking**
  Conferencing and collaboration systems must be properly integrated with digital signage in order to ensure a seamless experience that will enhance the quality of communications and improve productivity and engagement.
- **Ease of use**
  Quality design is the key to ease of use. You must fully define the use of a room, and work with a qualified integrator to design a solution that meets your needs but is not more complex than necessary.
Conceptual System Layouts for Your Consideration

Professional AV solutions supplied by Wesco Anixter

Audio Conferencing

Network Switch   Speakerphone

Content Sharing and Editing

Sources   Network   Wireless Presentation   Flat Panel Display

Video and Audio Conferencing
