

ADAPT

As the workplace evolves to meet new regulations and guidelines, how are you adapting to project demands?

We understand that keeping your team healthy is critical. We also know that new safety guidelines, limited labour and distancing protocols can slow you down, disrupt timelines and increase costs.

In addition to helping you reduce costs, save time, improve productivity and mitigate risk, we're here to assist in navigating these new challenges and help you:

- Meet new onsite safety protocols
- Overcome labour constraints
- Understand and deploy new technologies

SLIM-SPIN

SLIM-SPIN easily fits through standard doorways and doesn't need jack stands, enabling easy maneuverability throughout the jobsite and reducing the labour needed to set it up for pulls.

INSTA-REEL

INSTA-REEL can be easily transported to different areas of a jobsite and allows cable to be pulled without setting up jack stands, reducing the labour needed for a pull. It comes in multiple sizes and is suitable for medium-voltage cable, tray cable, building wire and fibre optics.

LAST MILE LOGISTICS

Anixter's last mile logistics services make electrical and consumable supplies easy to manage and access on your jobsite, eliminating time locating products and improving productivity.

KITTING

Kits reduce the number of products you receive, unpack and transport, while also reducing unproductive labour by eliminating time spent searching for and collecting various materials.

JOB CARTS

Job carts make consumable electrical supplies easy to manage and access, eliminating time spent sorting through boxes at the jobsite and improving productivity.

WHOLE ORDER DELIVERY

All of your products can be delivered together as one package to limit onsite receiving, handling and transporting.
