ANIXTER

AXIS COMMUNICATIONS

DATA CENTRE RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Axis, we are able to present you with the following offering to meet your specific data centre requirements.

Axis Data Centre Room and Cabinet Network Cameras
Controlling access to the data centre room and white space is critical to maintaining an effective physical security strategy. Once inside the data centre, a malicious threat can affect the core of the data centre, which is the infrastructure housed within the cabinet.

Axis has a complete line of network cameras designed to provide wide angle views of the entire room as well as easy, portable installation that allows placement in the middle of a hot or cold aisle.

AXIS F Series offers a flexible, rugged and discrete design perfect for the data centre cabinet.

CHALLENGE SOLVERS

- Monitoring authorised personnel activity
  - Discreet, pinhole cameras mounted at eye-level capture vital facial details from a natural angle for enhanced security and identification.
  - Automatic tampering alarms help to make sure the video surveillance system always works in order to take immediate action.
- Providing remote support to employees or contractors performing service requests
  - With remote access to live and recorded video, you can facilitate quick investigations and save on resources.
  - Augmenting video surveillance with distributed audio capabilities further enhances your ability to monitor the system reliably.
- Effective surveillance of obstructive views in the data centre room
  - Axis Corridor Format is perfect for data centre equipment aisles: the 16:9 format automatically becomes 9:16 for maximum coverage.
  - Axis PTZ cameras provide a 360 degree panoramic overview of a data centre room, while also being able to zoom in to see every detail of what's happening.

THE ANIXTER APPROACH

Six Layers of Physical Security – The Axis solutions on this brief focus on Layer 5 and Layer 6:

Data room
Implement high-security electronics to prevent general personnel or intruders from accessing sensitive areas.

Data cabinet
Establish protection of the sensitive electronics that contain critical data.

WHAT WE HEAR
Challenges from various data centre stakeholders:

PROTECTING the company's image

ACHIEVING regulatory compliance (HIPAA, PCI DSS, SOX, GLB)

BALANCING investment in both physical and logical security

STAYING one step ahead of adversaries with technology

EXECUTING policies and procedures specific to the data centre

Infrastructure as a Platform
by Anixter

THE AXIS SOLUTION

DATA CENTRE ROOM CAMERAS	DATA CENTRE CABINET CAMERAS	CAMERA ACCESSORIES

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploying physical security infrastructure into your data centre environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Resolution
- Frame rate
- Range of motion
- System integration

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Video management software
- PoE midspan and splitters
- Media converters
- Video surveillance control board

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

ROOM AND CABINET CAMERA FEATURES

✓ **AXIS M3006-V NETWORK CAMERA**

– 134° viewing angle
– 3 MP resolution provides 50 percent more details that HDTV 1080p

✓ **AXIS M3007-PV NETWORK CAMERA**

– Video motion detection and active tampering alarm
– 360°/180° panoramic views in up to 5 MP resolution

✓ **AXIS F44 FLEXIBLE CAMERA**

– Flexible, rugged, discreet design
– Supports two-way audio

✓ **AXIS F1035-E SENSOR UNIT**

– HDTV 1080p
– 194° horizontal field of view

Rugged, easy-to-install solutions
