LOCKSMITH SERVICES

When you need a locksmith on site, every second counts. But finding one—let alone one that is available—can be time consuming. Anixter’s Locksmith Services combines superior products with an exceptional network of experienced locksmiths to help security staff focus on higher priority tasks. One company, one process, one number to call whenever or wherever you need a locksmith across North America.

KEY CENTER CAPABILITIES

Maintaining the integrity of your key system is essential, especially when using an outside supplier. Anixter’s Key Center uses advanced security measures to protect your pre- and post-production inventory and key records. Our service scales to meet fast turnaround demands while still maintaining quality.

KEY MANAGEMENT

Often times a company’s key system—the most basic and fundamental foundation of asset protection—can be the most neglected. Without defined control and restricted access to keys, there is no way to know who has proper access to your facility. Anixter’s key management programs are customized end-user solutions that include key system policy, design and associated hardware.

CASH MANAGEMENT

Securing your cash could be one of the most important functions in your business due to events like burglaries, rolling night deposits and counterfeit bills. Anixter can help you determine the best solution for securing your cash including safes, cash boxes and GPS tracking devices to help mitigate these risks.

For more information, contact your local Anixter representative at 1.800.ANIXTER or visit anixter.com.
