

SOLUTIONS Linecard

SUPPLY CHAIN SOLUTIONS FOR CONTRACTORS AND INTEGRATORS

Implementing unique solutions at every phase of a project can help increase profitability and maximize labor efficiencies. Anixter's Supply Chain Solutions can support these goals by helping to save time, reduce costs, increase efficiencies and mitigate risk for your business.

SOURCING

Researching, identifying, validating and pricing products and managing multiple low-volume suppliers can be time consuming and create inefficiencies in your business.

INVENTORY MANAGEMENT

Managing lead times and returns along with replacement, obsolete, excess and scrap inventory can be time consuming and have an adverse effect on your schedule and budget.

PRODUCT ENHANCEMENT AND PACKAGING

Preparing the products you buy for installation can be costly and impact your profitability.

GLOBAL LOGISTICS

Every time products are moved or transported, the risks of project delays and added costs increase.

E-COMMERCE

Transaction processing is an operational necessity; however, it can be a burden on cost, efficiency and time.

IMPROVE CASH FLOW, REDUCE WORKING CAPITAL AND INCREASE LABOR EFFICIENCIES THROUGH CUSTOM SOLUTIONS FOR YOUR BUSINESS.

BASIC Solutions that can be added to an order today:

- Labeling
- Bulk jack packs
- Camera DOA check and firmware update
- Camera IP addressing
- UPS IP addressing
