

Global Expertise, Solutions and Project Support

Your Challenges Solved

Multi-national operations can present a wide array of challenges, regardless of the market or business objectives. Global market complexities are greater than ever when considering health and safety concerns, skilled labour shortages, supply chain continuity, environmental and regulatory requirements, and rapidly changing inflationary pressures. Whether you are building data centres in Asia, deploying smart city technology in Europe, or implementing a strategic sourcing program for multiple locations, we can help you:

- Improve execution to complete projects on time, on budget and with lower risk
- Increase safety measures
- Optimise your supply chain
- Perform compliance assessments and technology consultations

Global Project Execution

With a vast number of factors to consider for a global deployment, from compliance to technology selection and supply chain dynamics, selecting the right partner will help you develop best practices and streamline project deployments to simplify your complex operations:

Global Expertise

Management, single point of contact, global transactions, implementation and technical resources

Operations

Supply chain services, inventory team, transportation, warehousing

Coordination

Suppliers, integrators, contractors and consultants

Financial

Leveraged pricing, credit, business management, e-commerce

Contracts

Legal, global contracts, preferred T&Cs, compliance

Services

- Advisory services
- Installation enhancement
- Integrated supply
- Project deployment
- Supply chain services

Complex

Deployments

- Contractor partnerships
- Dedicated program teams and reporting capabilities
- E-commerce proficiency
- Global platform and programmatic approach
- In-region resources
- Logistical competence

Business Drivers

- 24/7 connectivity and security
- Automation and IoT
- Digitalisation
- Electrification
- Green energy and grid modernisation
- Supply chain consolidation

Industries Served

- Consumer packaged goods
- Engineering procurement construction
- Heavy equipment
- Manufacturers
- Metals and mining
- Multi-tenant data center (MTDC)
- Oil and gas

Comprehensive

Product Solutions

- Automation
- Communications and networking
- Electrical and lighting
- Energy management and renewables
- MRO and safety
- Power generation and distribution
- Security

Environmental, Social and Governance (ESG)

Wesco Anixter provides responsible solutions that support our customers' growth and operational excellence, and we do our part to protect the planet through our own corporate sustainability initiatives. In addition, Wesco Anixter creates a culture that starts with engagement and values: we believe that the diversity of our team members drives more powerful solutions that improve our customers' business outcomes.

Sustainable Supply Chain Solutions

Our prefabrication and packing services help save freight, coordination expense and packaging waste by efficiently shipping complete units rather than component parts.

Optimised inventory and materials management reduces shipping and transportation costs. Sourcing products with superior life cycles promotes sustainability by reducing the need for replacement parts. Online purchasing improves your balance sheet through reduced order cycle time, less tail spend and streamlined invoicing. Measure tangible impact through tracking diverted waste by volume or weight.

Energy Solutions

- Building health enhancements
- Compressed air
- Electrical vehicle (EV) charging stations
- LED lighting
- Peak demand charge avoidance
- Smart building controls and IoT
- Smart metering
- Solar panels
